Backend : Node.js, Express.js, REST APIs

Database : MongoDB, Firebase Authentication

Tools & Deployment : Git, GitHub, Netlify, Vercel

PROJECTS

RECIPE FINDER

[Live Link](#) [GitHub Client](#)

Smart Recipe Finder is a front-end web application that allows users to search meals, explore detailed recipes, and manage favorite dishes through a clean and interactive user interface.

- **Recipe search Interface** : Vanilla JavaScript and TheMealDB REST API.
- **Real-time meal search** : Dynamic Data rendering without page reloads.
- **Detailed recipe view** : Detailed recipe view (ingredients, instructions, images, YouTube links)
- **Favorites system** : Persistent storage of favorite meals using browser localStorage.
- **Tech Stack** : HTML, CSS, JavaScript (ES6), REST API, LocalStorage.

DOC POINT

[Live Link](#) [GitHub Client](#)

DocPoint is a front-end web application that allows users to explore doctors, view detailed profiles, and book or manage appointments through a clean and interactive interface.

- **Doctor browsing** : Explore doctor's name, specialty, and availability.
- **Detailed doctor profiles** : View detailed doctor profiles.
- **Appointment management** : Book or cancel appointments without page reload.
- **Persistent storage** : Persistent appointment storage using localStorage.
- **Interactive notifications** : Interactive notifications for success and errors.
- **Tech Stack** : React, Tailwind CSS, HTML, JavaScript (ES6), LocalStorage.

DRAGON NEWS

[Live Link](#) [GitHub Client](#)

Dragon news is a front-end web application that allows users to browse news and access detailed articles only after login with secure authentication options through Google or email/password, providing a personalized and interactive experience.

- **News browsing** : Explore articles by categories such as Technology, Sports, Entertainment, etc.
- **Protected article** : Only authenticated users can read full news articles
- **Authentication** : Secure login/register using Firebase Auth with Google Auth and email/password.
- **Tech Stack** : React, React Router, Firebase Auth, HTML, CSS, JavaScript (ES6), REST API.

EDUCATION

- **Certifications**: [Diploma in Computer Science](#)

ADDITIONAL INFORMATION

- **Languages**: Bangla (Native), English (Intermediate)
